**RFP 011-1920; PBIS Planning and Continuous Improvement**

**Addendum No. 1**

**October 16, 2019**

**Questions asked on RFP 011-1920 and responses in red**

- In addition to PBIS planning and monitoring, would the District be interested in a system that monitors academic, attendance, and/or SEL data alongside behavior data? **The district will seriously consider any proposal that effectively demonstrates necessary components to the continuous improvement of a comprehensive PBIS system.**
- What are the needs identified from the District's recent audit (referenced on pg. 2) of current district PBIS programming and systems? **The audit was recently conducted and the report is not yet available. Outcomes, however, will be received in time for District and School-Based Strategic Planning work identified in the Scope of Work of the RFP.**
- What existing software (referenced on pg. 2) does the District currently use that should be integrated with the proposed software? **It would be convenient if any proposed software had the ability to directly roster and update nightly from the District Student Information System, Synergy, or from Clever but it is not a requirement. The district also utilizes Illuminate Data and Assessment for academic formative assessment, but this platform has the ability to also house some behavior related data. Again, while the submitter may choose to demonstrate convenient integration abilities of a proposed software, it is not required.**
- What Student Information System (SIS) does the District currently use? **Synergy from Edupoint.**
- For the School-Based Strategic Planning for a minimum of 28 days up to a maximum of 35 days, is this support to be delivered in-person? **Face to face delivery of services usually demonstrates the highest effectiveness.** Is this estimated time for each school or is it inclusive of all schools (district-wide)? **This time is inclusive of all schools (district-wide).**

- What specific functionality is the district hoping for in the associated software to complement the PBIS services? **If the Strategic Planning results in the need for surveys, detailed behavior tracking, and/or behavior goals, a respondent may choose to submit a software system they have found to efficiently support the implementation of PBIS. A software component is not required, but a vendor may choose to demonstrate necessity of a certain software within the proposal.**
- Is the district hoping to provide these services on an annual basis or is this a one-time service? **The district will evaluate the services at year end and may choose to renew for additional annual terms, for up to Four years.**
- What is the anticipated budget for this program? **The district foresees proposals in ranges anywhere from \$30,000 to \$100,000, but at this time has sufficient budget to seriously consider all appropriate proposals for the requested Scope of Work.**
